

ZEUS

Insurance Protocol

Trust Layer for the Agentic Economy

Decentralized insurance and escrow for AI agents.

AI Agents Lose Millions on Failed API Calls.

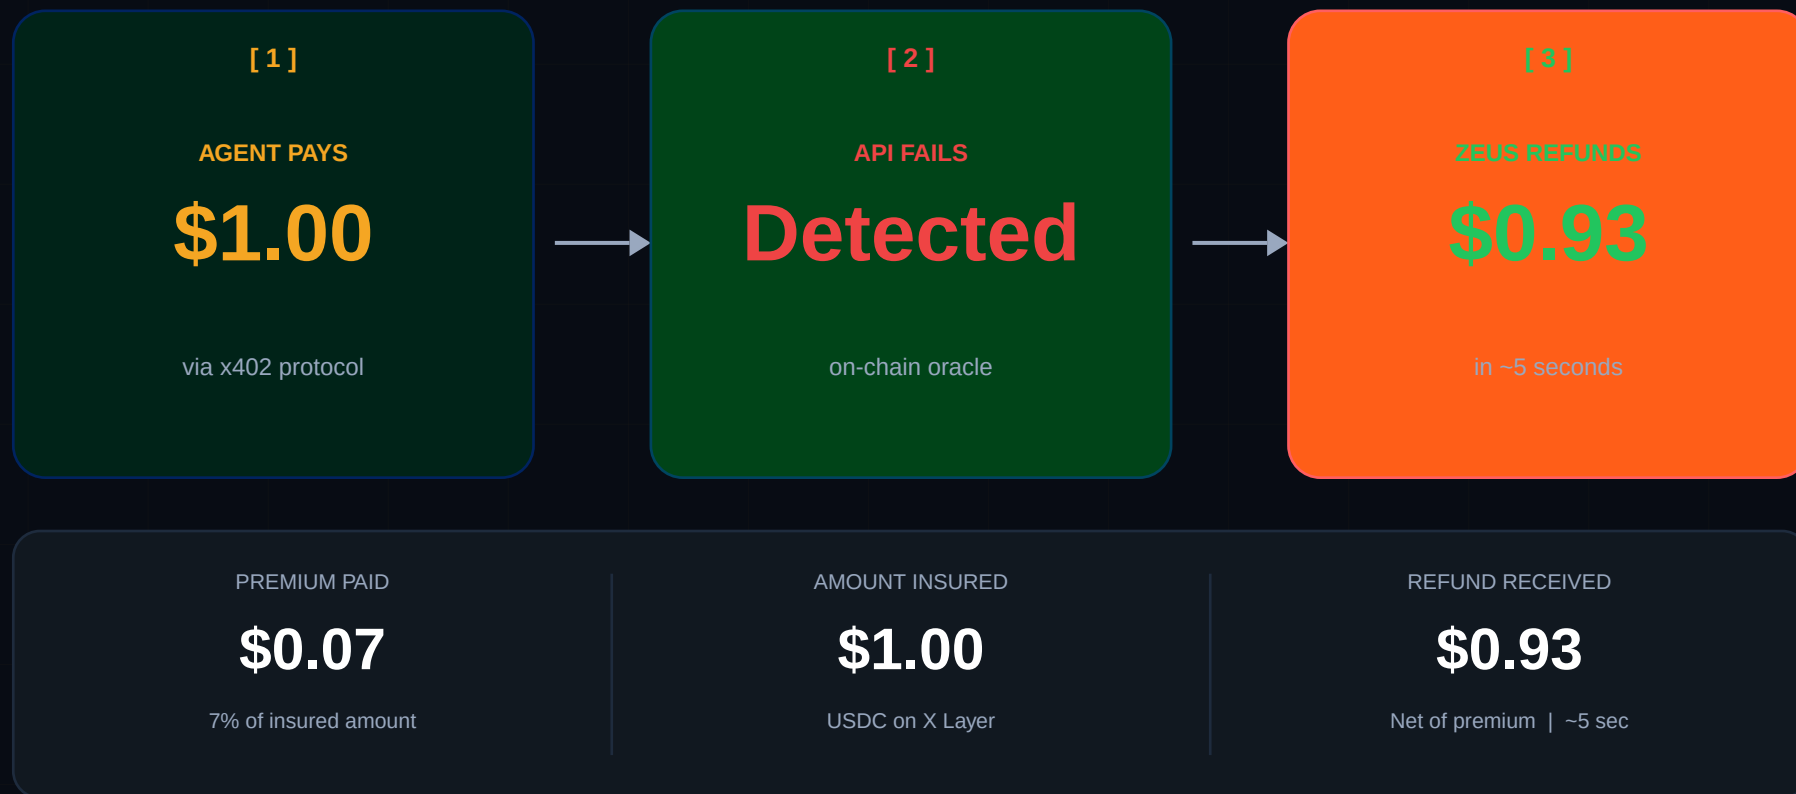

The Problem

- > API does not respond — funds already debited.
- > Refunds require trust and take days.
- > No standard way to insure a transaction.
- > AI agents operate autonomously — no human recourse.
- > Every failed call = lost revenue for the agent.

The Zeus Solution

- > Automatic insurance & escrow on-chain.
- > Instant payouts from the reserve fund.
- > Integrate in 3 steps via SDK or REST API.
- > Fully autonomous — agents need no human.
- > Non-custodial, trustless, fully auditable.

Automatic Protection in Action.

"Agent pays \$1.00. API fails. Zeus automatically refunds \$0.93 to the agent wallet."

Two Products, One Trust Layer.

MODEL A — ESCROW

Protected Transaction

- > Funds locked until delivery is confirmed.
- > 0.7% + \$0.02 flat fee per transaction.
- > Full deposit refund on timeout.
- > Automated release via on-chain oracle.
- > Full audit trail on X Layer Mainnet.

Commission: 0.7% + \$0.02 per tx | Non-custodial

MODEL B — INSURANCE

Smart Coverage Suite

All-inclusive Insurance

- Covers API failures, network errors, wallet limits, gas shortages, MCP errors.
- Dynamic premium based on Risk Score.
- Instant payouts from reserve.

Arbitration Risk

- Rate: 8% of dispute amount — protects against incorrect OKX AI Evaluator rulings.

Slashing Protection

- Compensation for validator slashing.
- Protection for stakers and node operators.

Premium from 7% | Dynamic Risk Score | Auto-payout

Built for the Agent Economy.

X Layer Mainnet

Chain 196 (OKX L2)

Our primary deployment network.
Fast, cheap, EVM-compatible.
Live and audited.

OKX AI Agent Marketplace

ASP #7202

Listed agent service provider.
Agents discover & pay Zeus
via native OKX AI flows.

x402 Protocol

HTTP-native payments

Agents pay per call with USDC.
No accounts, no approvals.
Fully autonomous M2M.

MCP Server

7 AI tools available

Plug Zeus into any agent:
get-quote, buy-policy,
claim-policy, escrow + more.
